UNRO DISPENSER SYSTEM

Hygienic. Drip-free. Minimum waste.

The UNRO dispenser is an established portion dispensing solution that is perfect for liquid products.

The UNRO dispenser is simple to assemble straight onto the product packaging. The dispenser's design enables you to get a consistent drip-free portion with each squeeze.

The UNRO dispenser is neat in its design - heavy packs, wobbly bottles, loose corks, and sticky products can therefore be avoided. The construction is hygienic and easy to clean with a yield that generates minimum product waste.

The UNRO dispenser system is intuitive, commercial, and easy to use. Clean up your condiment station with our innovative solution.

UNRO dispenser system is produced in high quality material in Scandinavia.

UNRO DISPENSER SYSTEM

How the UNRO system works

When you squeeze the dispenser, the valve is pushed upwards by the pressure of the product, opening the outflow to allow the required amount of the product to be dispensed.

When you stop squeezing, the outflow stops and the dispenser is filled from the pack. When not activated, the valve inside the dispenser seals off the outflow to prevent leakage.
